PROFESSIONAL SUMMARY

Results-driven Power BI Developer with strong experience in designing and delivering interactive dashboards and enterprise-level reports. Skilled in **Power BI, DAX, Power Query, SQL, Power Automate, and Excel**, with a solid understanding of data models, performance optimization, and business requirements analysis. Proven ability to transform complex datasets into clear, actionable insights that support strategic decision-making. Experienced in automating reports, ensuring data accuracy, and collaborating with stakeholders across departments.

WORK EXPERIENCE

Power BI Developer

Self-Learning & Professional Development| Riyadh, KSA| **10/2025 - Present**

- Collected, cleaned, and inspected large datasets from multiple sources.
- Developed Power BI dashboards and visualizations to communicate insights clearly.
- Identified trends, patterns, and anomalies to assist strategic decision-making.
- Evaluated large datasets to identify trends and KPIs.
- Design, develop, and maintain BI reports, dashboards, and data visualizations for management and stakeholder presentations
- Ensure data accuracy, consistency, and relevance across reports and dashboards.
- Collaborate with business users, data engineers, and analytics teams to support BI initiatives.
- Created robust data models using Power BI Desktop and implemented efficient DAX measures, calculated columns, and role-level security.
- Created a Power Query M language transformation for data cleaning and collection.
- Improved SQL Server performance by optimizing data structures and queries, resulting in a 30% reduction in storage usage
- Developed and automated healthcare reports to analyse patient and operational KPIs, improving efficiency, service quality, and data compliance.
- Build automated reporting solutions and integrate Power BI with other tools and platforms (Power BI Services, Power Automation)

Power BI Developer

BADR Airline |Khartoum, SD| **04/2021 – 10/2025**

- Design, develop, and maintain Power BI reports and dashboards for multiple business functions, ensuring accuracy, performance, and usability.
- Create robust data models using Power BI Desktop and implement efficient DAX measures, calculated columns, and role-level security.
- Collaborate with data engineering and ETL teams to define data requirements, ensure reliable data sources, and optimize data pipelines for reporting needs
- Implement and maintain Power BI workspace governance, deployment pipelines, versioning, and scheduled refreshes, ensuring adherence to best practices and security standards
- Optimize report performance through query tuning, aggregation tables, incremental refresh, and model design improvements.

- Collaborate with business stakeholders to gather requirements, translate them into analytics solutions, and iterate on visualizations based on user feedback and metrics.
- Develop and document data dictionaries, modelling conventions, report specifications, and end-user guides to promote consistency and adoption.
- Build automated reporting solutions and integrate Power BI with other tools and platforms (Power BI Services, Power Automation)

Data Analyst

IOM| Khartoum, SD| **01/2020 – 01/2021**

- Transform raw data into meaningful insights by extracting, cleaning, and organizing data from multiple sources
- Optimize performance of existing dashboards and reports, ensuring they are user-friendly and accessible.
- Collaborate with IT to ensure data integrity, security, and proper governance protocols are maintained
- Managed Excel master sheets and processed data from over 1500 forms
- Achieved 40% improvement in data refresh efficiency while standardizing cross-domain quality control
- Work closely with stakeholders to gather and analyze business requirements for BI solutions.
- Automate Power BI Service processes to save 50% of manual time
- Integration of Data by ETL Using SSIS

Cargo Warehouse Agent

MAKS| Khartoum, SD | **07/2019 – 01/2020**

Cargo Officer

National Aviation Services |Khartoum, SD| **11/2016 – 04/2019**

Administrative Assistant

CAA - Khartoum airport| Khartoum, SD| **03/2015 – 01/2016**

EDUCATION

Bachelor of Business Administration

University of Sciences and Technology | Khartoum| SD| **08/2014**

SKILLS

- Data Cleaning
- Data Validation
- Data Visualization & Reporting
- Power BI Dashboards development
- Writing DAX function, Data Modeling
- SQL Server T-SQL, Queries, Stored Procedures
- SSIS ETL
- Data Warehouse
- Azure
- Power Automate

Soft Skills

- Time Management & Prioritization
- Adaptability & Learning Agility

- Large Dataset Analysis
- Trend & Pattern Identification
- Business & Operational Reporting
- Communication & storytelling
- Problem solving
- Attention details
- Analytics

CERTIFICATIONS

- DP-900 Microsoft Azure Data Fundamentals |**12/2025**
- PL-300: Microsoft Power BI Data Analyst Associate |**05/2025**
- PMP | Quality & I.T Experts Co. Ltd |**11/2023**
- OH&S Management System | Quality & I.T Experts Co. Ltd |**12/2023**
- Human Factor Certificate |**04/2022**
- Airline Ticketing, Booking & Customer Care | Cambroon Academy |**02/2022**
- Safety Management System (SMS) |**04/2022**
- Database Design in HR management, Microsoft Access |**12/2014**

Language

- Arabic Native
- English Advanced
