

MOHAMMED AHMED

POWER BI DEVELOPER | BUSINESS INTELLIGENCE DEVELOPER

Riyadh, Saudi Arabia | Available Immediately | +966 598207539 | mohammed.eisaahmed39@gmail.com
LinkedIn: linkedin.com/in/mohammed-ahmed-392004297

PROFESSIONAL SUMMARY

Business Intelligence / Power BI Developer with 5+ years of hands-on experience developing enterprise dashboards, analytical reports, BI solutions, and data models using Power BI, DAX, SQL Server, Power Query, and SSIS. Strong expertise in data modeling, semantic models, Star Schema, Data Warehousing, ETL, KPI development, report performance optimization, and Power BI Service. Experienced in transforming multi-source operational and financial data into business-ready analytical models and developing banking and financial analytics dashboards. Skilled in advanced SQL concepts, DAX calculations, data validation, data quality, RLS, incremental refresh, and automated reporting solutions.

Skills

BI & Reporting: Power BI, Dashboard Development, Report Development, Executive Dashboards, KPI Design
Data Modeling: Semantic Models, Star Schema, Dimensional Modeling, Fact Tables, Dimension Tables, Data Warehouse
Data & ETL: SQL Server, Advanced SQL, SQL Queries, Stored Procedures, SSIS, Power Query, ETL, Data Transformation
Analytics: DAX, Measures, Calculated Columns, Time Intelligence, Financial Analytics, Banking Analytics
Power BI Service: Gateway, Scheduled Refresh, Incremental Refresh, Row-Level Security (RLS), Performance Optimization
Cloud & DevOps: Microsoft Azure, Microsoft Fabric Fundamentals, Azure DevOps
Automation: Power Automate, Automated Reporting, Data-Driven Workflows

PROFESSIONAL EXPERIENCE

POWER BI DEVELOPER — FREELANCE PROJECTS

Riyadh, Saudi Arabia | 10/2025 – Present

- Designed and developed 8+ interactive Power BI dashboards covering Sales, Finance, Operations, HR, and Healthcare.
- Developed BI reports and dashboards using Power BI, DAX, Power Query, and SQL-based data sources.
- Built and maintained Power BI semantic models using Star Schema, fact and dimension tables, relationships, measures, and business KPIs.
- Developed advanced DAX measures, calculated columns, and analytical calculations to support business reporting and decision-making.
- Integrated and transformed data from multiple sources using Power Query and SQL.
- Implemented data cleaning, validation, standardization, and quality checks to improve reporting accuracy.
- Optimized Power BI reports and data models, reducing refresh time from 12 minutes to 4 minutes and storage consumption by approximately 30%.
- Automated Power BI reporting processes for 6+ business users, reducing manual reporting effort by approximately 40%.
- Configured Power BI Service solutions including scheduled refresh, gateway connectivity, RLS, and automated reporting workflows.
- Developed financial and banking analytics dashboards covering customer retention, cross-selling opportunities, loan approval rates, revenue generation, and financial KPIs.
- Translated business requirements into analytical data models, dashboards, reports, and actionable KPIs.

POWER BI DEVELOPER — BADR AIRLINE

Khartoum, Sudan | 04/2021 – 10/2025

- Developed Power BI reports and operational dashboards using data from multiple sources.
- Collected, transformed, validated, and analyzed operational shipment data using Excel, SQL, and Power BI.
- Designed analytical reporting structures to monitor shipment volumes, quantities, weights, operational performance, and business KPIs.
- Developed recurring monthly reports for flights, shipments, quantities, weights, revenues, and operational performance.
- Performed data cleaning, validation, standardization, and reporting accuracy checks.
- Used SQL queries to extract and prepare data for business intelligence reporting.
- Collaborated with airline and operations teams to understand business requirements and improve reporting processes.
- Supported management with data-driven insights into operational and financial performance.

DATA ANALYST — IOM

Khartoum, Sudan | 01/2020 – 01/2021

- Gathered and analyzed operational and financial business requirements to develop data-driven reporting solutions.
- Developed and optimized Power BI dashboards and analytical reports for business users.
- Managed Excel master datasets and processed data from 1,500+ forms.
- Improved data refresh efficiency by approximately 40% through data standardization and process optimization.
- Automated Power BI Service reporting processes, reducing manual reporting effort by approximately 40%.
- Integrated multiple data files using SSIS ETL workflows.
- Performed data quality control, validation, cleaning, and standardization across multiple datasets.

CARGO WAREHOUSE AGENT — MAKS

Khartoum, Sudan | 07/2019 – 01/2020

- Managed cargo warehouse operations and shipment-related information.
- Maintained accurate operational records, supported shipment data collection, and reporting.

CARGO OFFICER — NATIONAL AVIATION SERVICES

Khartoum, Sudan | 11/2016 – 04/2019

- Managed air cargo operational activities and shipment documentation.
- Monitored shipment information, cargo quantities, and operational processes.

ADMINISTRATIVE ASSISTANT — CAA, KHARTOUM AIRPORT

Khartoum, Sudan | 03/2015 – 01/2016

- Managed administrative records, documentation, and data entry activities.
- Prepared reports and maintained accurate operational information.

SELECTED BI PROJECTS

Banking & Financial Analytics Dashboard

Power BI | DAX | Power Query

Analyzed customer retention, cross-selling opportunities, loan approval rates, revenue generation, and business KPIs; created analytical measures and applied dimensional modeling concepts.

Sales Analytics Dashboard

Power BI | SQL Server | DAX | Power Query

Developed sales performance dashboards covering revenue, sales growth, profit margins, customer retention, conversion rates, and sales KPIs.

HR Analytics Dashboard

Power BI | DAX | Power Query: Developed HR analytics reports to monitor workforce-related KPIs and operational performance.

Healthcare Analytics Dashboard

Power BI | DAX | Power Query: Developed healthcare KPI dashboards for analytical reporting and management insights

EDUCATION

Bachelor of Business Administration — University of Sciences and Technology, Khartoum, Sudan | 2014

CERTIFICATIONS

-
- PL-300 — Microsoft Power BI Data Analyst Associate | 2025
 - DP-900 — Microsoft Azure Data Fundamentals | 2025
 - PMP | 2023
 - OH&S; Management System | 2023
 - Human Factor | 2022
 - Airline Ticketing, Booking & Customer Care | 2022
 - Safety Management System (SMS) | 2022
 - Database Design in HR Management, Microsoft Access | 2014
