Profiles SUMMARY

Business Intelligence 5+ Years' Experience, with strong experience in designing and delivering interactive dashboards and enterprise-level reports. Skilled in Power BI, Data Model, Power Query ETL Transformations, SQL Queries, Power Automate, and Excel, with a solid understanding of data models, performance optimization, and business requirements analysis. Proven ability to transform complex datasets into clear, actionable insights that support strategic decision-making. Experienced in automating reports, ensuring data accuracy, and collaborating with stakeholders across departments.

WORK EXPERIENCE

Power BI Developer

Self-Learning & Professional Development | Riyadh, KSA | **10/2025 - Present**

- Collected, cleaned, and analyzed large sales datasets from multiple sources to ensure data accuracy and consistency.
- Developed interactive Power BI dashboards to monitor sales performance, revenue trends, customer behavior, and key business metrics.
- Evaluated sales data to identify trends, opportunities, and KPIs such as sales growth, profit margins, customer retention, and conversion rates.
- Identified patterns and anomalies in sales activities to support strategic decision-making and improve business performance.
- Designed, developed, and maintained BI reports, dashboards, and visualizations for management.
- Collaborated with sales teams, business users, and data engineers to understand reporting requirements and support business intelligence initiatives.
- Built robust data models in Power BI Desktop and implemented efficient DAX measures, calculated columns, and row-level security to enhance reporting capabilities.
- Utilized Power Query (M Language) to clean, transform, and integrate sales data from multiple sources.
- Optimized SQL Server queries and data structures, improving report performance and reducing storage consumption by 30%.
- Developed automated sales reports to track revenue, product performance, sales targets, and customer purchasing patterns, enabling timely business insights.
- Integrated Power BI with Power BI Service and Power Automate to automate report refreshes, notifications, and data-driven workflows.
- Evaluated banking datasets to measure performance indicators such as customer retention, cross-selling opportunities, loan approval rates, and revenue generation.
- Collaborated with business users, risk teams, compliance officers, and data engineers to gather reporting requirements and support business intelligence initiatives.
